

Pablo Rocabert Messa

Architect & Urban Design Manager

Design coordination · Urban design · Digital twins

procabert.au@gmail.com
linkedin.com/in/pablorocabertm
Barcelona, Spain

PROFESSIONAL SUMMARY

Architect and urban designer experienced in coordinating architecture and data teams across urban consulting and city digital twin projects. Translate client requirements into technical tasks, organise team contributions and track deadlines and deliverables. Bring additional experience in building design, construction documentation and coordination with consultants, contractors and public administrations, supported by digital modelling and real estate analysis skills.

CORE CAPABILITIES

Multidisciplinary coordination · Task planning and delivery tracking · Client requirements · Design documentation · Consultant and contractor liaison · Planning constraints · Digital design · Client presentations

PROFESSIONAL EXPERIENCE

Aretian Urban Analytics and Design

Aug 2024 – Present

Barcelona

Senior Urban Designer & Data Scientist — Aug 2025 – Present

- Coordinate architecture and data teams across urban consulting and city digital twin projects, connecting client requirements with technical tasks and deliverables.
- Organise team activities and track deadlines and delivery progress across architecture, spatial analysis and design contributions.
- Prepare maps, reports and presentations for clients and public administrations, bringing technical findings and design proposals together into clear project outputs.
- Develop urban design alternatives with Rhino and Grasshopper, translating territorial analysis into proposals informed by site conditions and planning requirements.

Urban Designer — Aug 2024 – Jul 2025

- Supported urban analytics and planning projects through land-use, mobility and accessibility studies, contributing spatial evidence to design recommendations.
- Produced maps, analytical diagrams and visualisations to communicate site opportunities and constraints to technical and non-technical audiences.

Project context | Urban analytics consulting and city digital twins

Integrated parcel-level planning information into the Barcelona Metropolitan Region digital twin, linking land parcels with permitted uses and development capacity. Combined planning knowledge with Python and QGIS workflows to structure information for assessing development opportunities.

The wider consulting work brought together housing, mobility, land-use and economic activity data with urban design, with outputs presented to clients and public administrations.

Architect
Mar 2022 – Jul 2024

Turull Sorensen · Barcelona

- Developed building and refurbishment projects, from design proposals to construction details and drawings for execution.
- Coordinated project documentation with public administrations, developers, consultants and contractors across project stages.
- Reviewed planning regulations and prepared technical reports to define project requirements and development constraints.

Project context | Building and refurbishment design

Worked across design development and technical documentation, connecting architectural proposals with planning conditions and construction details. Outputs included design drawings, execution documentation and technical reports used by project stakeholders.

Real Estate Analyst
Oct 2018 – Mar 2022

Busquets Galvez · Barcelona

- Built Excel investment models covering costs, revenues and returns to support real estate evaluation and investment decisions.
- Contributed to the valuation of a hotel and residential building in Porto and office market analysis in Barcelona's 22@ district.

Architectural Intern
May 2018 – Oct 2018

Jorge Vidal Studio · Barcelona

- Supported architectural design and documentation through 2D construction drawings, 3D models and visualisations.

EDUCATION

Master of Data Analytics & AI — Nov 2025 – May 2026
Nuclio Digital School

Master of Architecture and Urbanism — 2023 – 2024
La Salle – Ramon Llull University

Bachelor of Architecture — 2014 – 2023
Universitat Politècnica de Catalunya

PROFESSIONAL SKILLS

Management and communication: Project and team coordination, task organisation, deadline and deliverable tracking, client presentations and public speaking. Participation in congresses and round-table discussions at multiple events.

Design and modelling: AutoCAD, Revit, Rhinoceros, Grasshopper; 3D modelling, parametric design and visualisation.

Spatial analysis and data: QGIS, Python, GeoPandas, Shapely, Folium; planning and parcel analysis, data preparation and city digital twins.

Commercial analysis: Excel investment models, development feasibility and real estate evaluation.
